

GNU/Linux 101

Zamanlanmış görevler:

service cron status

- Komut : crontab
- Configuration file : /etc/crontab
- Varsayılan editör : vim

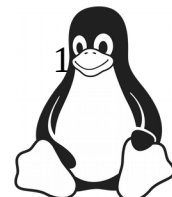

/etc/crontab

m	h	dom	mon	dow	command
---	---	-----	-----	-----	---------

27,42	12	15-30	2	1-5	chmod ..
-------	----	-------	---	-----	----------

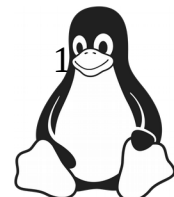

0	22	*	*	*	./my.sh
---	----	---	---	---	---------

Processes

- `jobs` //arka planda çalışan process'lerin listesi
- `fg` == arka planda çalışan process'i öne almak
- `bg`
- `nohup` == komutu arka planda çalıştırıp çıktısını ön plana atar

// `ctrl +z` ile ön planda çalışan process'leri durdurup çalışmayı beklemek üzere arka plana atar;
bekleyenleri `bg` komutu ile tekrar çalıştırabiliriz.

SSH

```
service start ssh  
ssh-keygen -t rsa  
scp /root/id_rsa.pub root@IP:/root/.ssh/id_rsa.id
```

- ssh root@IP
- ssh root@topukcan
- ssh IP
